

LUIS COLMENARES

Systems Engineer

PERSONAL DETAILS

mrluisgamerps3@gmail.com, +584246551041

Nationality: Venezuela

PROFILE

Systems Engineer with experience in software development, customer success, and technical support, skilled in frontend and backend development using Python, Django, JavaScript, React, SQL, Git, HTML, and CSS, as well as mobile application development with Kotlin and Firebase, I have experience in troubleshooting SaaS platforms, analyzing system logs, supporting API integrations, and working directly with customers to resolve technical issues. Also I have a Strong background in sales, customer service, appointment setting, and digital marketing, including Amazon PPC campaign management, im a professional known for problem solving, adaptability, and delivering results in both technical and customer facing roles.

EMPLOYMENT

Freelance Full-Stack Developer

Present

- Engineered full-stack web applications using Django (Python) for backend logic and JavaScript for frontend interactivity.
- Designed, implemented, and optimized PostgreSQL databases to ensure data integrity, performance, and scalability for client projects.
- Developed secure RESTful APIs with Django REST Framework to connect frontend components with backend services and databases.
- Collaborated directly with clients to gather requirements, provide technical guidance, and deliver tailored digital solutions.

Customer Success Manager & Platform Support Specialist

Moja AI, United States

- Deliver Tier 1 and Tier 2 support for a cloud based call tracking and lead routing platform.
- Troubleshoot RTB workflows, API integrations, routing plans, call flows, publisher configurations, buyer endpoints, and reporting discrepancies.
- Perform log analysis and system diagnostics to investigate routing failures, bidding outcomes, allocation issues, and campaign behavior.
- Work directly with customers to configure campaigns, publishers, targets, routing plans, and reporting structures.
- Support operational reporting and data analysis to improve customer performance and platform utilization.
- Coordinate with development teams to escalate and resolve platform defects and integration issues.

Systems Support & Developer

Bellarci Store, United States

- Developed and deployed a full-stack web solution using Django Framework for back-end functionality.

- Implemented a PostgreSQL database architecture to efficiently store and manage all product data.
- Managed Shopify webs and sales.

Amazon PPC Specialist

Jungleclick PPC, United States

- Managed and optimized Amazon PPC campaigns (Sponsored Products, Brands, Display) to drive sales and improve profitability.
- Developed and executed strategies to lower ACoS and increase Return on Advertising Spend.
- Conducted keyword research, bid management, and competitor analysis to enhance campaign targeting.
- Analyzed campaign performance data to generate insights and recommend optimizations.
- Collaborated with the marketing and sales teams to align PPC strategy with broader business goals.
